

# ?Custom Plans & Upgrades

---

Here at AtomicHost we fully support custom plans & upgrades for your server!

---

## How can I create a custom server?

To enquire on a custom server to meet your needs, you can create a support ticket, or directly message a higherup on the [discord](#). We do support handling this over tickets, but note this may take longer for responses!

## Can I do a custom upgrade on my server?

If you want to upgrade just your `RAM`, or just your `CPU Cores` etc, you can!

To do so, please open a support ticket, and enquire on your custom upgrade!
