

?How do i connect to my rust server

To connect to your rust server, you can do one of the following:

Search for your server in the Community / Modded Tab

(May take up to 24 hours to show)

You can search for your server name which you spesified in the settings, or before purchasing the server.

Manual Connect

(Will work instantly after server has started)

When Rust has loaded, press `f1` and run `client.connect <serverIP>`, this can be found on the `console` tab.
